

Name: _____

Solar System Object Report

	4 (Exceeding)	3 (Proficient)	2 (Approaching)	1 (Dev.)
Planets	Student categorized planets into two distinct groups based on a scaled property.	Student correctly identified the features, composition and location of planets.	Student correctly identified most characteristics of planets.	Student correctly identified one characteristic of planets.
Dwarf Planets	Student explained how dwarf planets are distinct from actual planets based on a scaled property.	Student correctly identified the features, composition and location of dwarf planets.	Student correctly identified most characteristics of dwarf planets.	Student correctly identified one characteristic of dwarf planets.
Asteroids	Student explained how asteroids are different than dwarf planets OR comets based on a scaled property.	Student correctly identified the features, composition and location of asteroids.	Student correctly identified most characteristics of asteroids.	Student correctly identified one characteristic of asteroids.
Comets	Student explained how comets are different than asteroids based on a scaled property.	Student correctly identified the features, composition and location of comets.	Student correctly identified most characteristics of comets.	Student correctly identified one characteristic of comets.
Overall	Student was proficient and exceeded at least half of the categories.	Student was proficient in most categories, with no developing categories.	Student was approaching in most categories. No more than one developing score.	Student was developing in several categories.
